In this edition are expanded chapters on boat accident reconstruction, an entirely new chapter on skipper responsibilities, and updated information recreational boating law. Whether you are a beginner or experienced litigator or any expert dealing with a boat accident, the information contained in this excellent resource will save you hours of research time hunting through less complete texts and online services.If you are a lawyer or an accident reconstructionist, this book will help you find appropriate data, analyze it, and determine cause in a boat accident. The book is a compendium of information useful in litigation dealing with activities in and on the water. The third edition of Boat Accident Reconstruction and Litigation covers everything from the way boats function to how they are designed. It introduces you to fluid mechanics and explains the numerous formulae and other methods used to analyze boat accidents. It even includes an extensive series of appendices of useful Coast Guard regulations and rules.

A pioneering urban economist presents a myth-shattering look at the majesty and greatness of cities America is an urban nation, yet cities get a bad rap: they're dirty, poor, unhealthy, environmentally unfriendly . . . or are they? In this revelatory book, Edward Glaeser, a leading urban economist, declares that cities are actually the healthiest, greenest, and richest (in both cultural and economic terms) places to live. He travels through history and around the globe to reveal the hidden workings of cities and how they bring out the best in humankind. Using intrepid reportage, keen analysis, and cogent argument, Glaeser makes an urgent, eloquent case for the city's importance and splendor, offering inspiring proof that the city is humanity's greatest creation and our best hope for the future. "A masterpiece."—Steven D. Levitt, coauthor of Freakonomics "Bursting with insights."—The New York Times Book Review

Since the mid-1990s, the emergence of hydrogen economy and the speed with which it will arrive have been vigorously debated. As a disruptive technology, dominant designs for the production, storage and distribution of hydrogen have not yet been established. Not have performance characteristics been achieved to compete with the existing combustion engine, though the efficiency and durability of hydrogen fuel cells are improving. This publication highlights the uncertainties involved in making choices about hydrogen and fuel cells in planning the development policies on national energy, environment and transport sector.

Chang's best-selling general chemistry textbook takes a traditional approach and is often considered a student and teacher favorite. The book features a straightforward, clear writing style and proven problem-solving strategies. It continues the tradition of providing a firm foundation in chemical concepts and principles while presenting a broad range of topics in a clear, concise manner. The tradition of Chemistry has a new addition with co-author, Kenneth Goldsby from Florida State University, adding variations to the 12th edition. The organization of the chapter order has changed with nuclear chemistry moving up in the chapter order.

This book takes on current perspectives on children ' s relationships to literacy, media, childhood, markets and transnationalism in converging global worlds. It introduces the idea of multi-sited imaginaries to explain how children ' s media and literacy performances shape and are shaped by shared visions of communities that we collectively imagine, including play, media, gender, family, school, or cultural worlds. It draws upon elements of ethnographies of globalization, nexus analysis and performance theories to examine the convergences of such imaginaries across multiple sites: early childhood and elementary classrooms and communities in Puerto Rico and the Midwest United States. In this work we attempt to understand that the local moment of engagement within play, dramatic experiences, and literacies is not a given but is always emerging from and within the multiple localities children navigate and the histories, possibilities and challenges they bring to the creative moment.
