It is generally acknowledged that the most cost-effective means of curtailing alcohol and drug abuse is prevention. Providing interventions to at-risk individuals before they develop serious problems with substance use is the most important component of the "war on drugs." Fortunately, the past decade has seen a dramatic increase in the quantity and quality of scientific research on those areas crucial to the advancement of prevention science. This book compiles a tremendous amount of information about prevention which has accumulated in recent years. Documenting these accomplishments and setting the stage for future efforts comprise the focus of this book. Prevention and Societal Impact of Drug and Alcohol Abuse is divided into four parts. Part I contains introductory chapters addressing current issues in prevention science and characteristics of abusable substances. Part II includes chapters on the historical contexts of substance abuse and the deleterious health consequences of alcohol and other drugs. Part III focuses on the impact of drug and alcohol abuse on society. Included are chapters on alcohol and drug abuse and driving, infectious illness, disability, managed care, the criminal justice system and adolescents and adults, sale and distribution, the media, and community responses. Part IV consists of chapters on prevention in specific settings and with certain populations.

Evidence suggests that some forms of domestic crimes are growing at an alarming rate. An epidemic of violence and maltreatment within the home and between intimates exists, often as part of an interrelated cycle: abuse victim becomes violent abuser. This book will be of interest to educators, students and professionals in the fields of child health and welfare, criminal justice, women's studies, gerontology, sociology and related areas. Part I is an introduction on domestic criminality that includes an historical review, demographic studies, and a discussion of medical treatments for victims. Issues such as domestic fatalities, battered women and men, conjugal rape, and abuse of elders are covered in Part II. An examination of child maltreatment by neglect and sexual abuse is discussed in Part III and symptoms of domestic criminality are covered in Part IV. Part V addresses theories, causes, and explanations of domestic violence, attempting to bridge gaps between existing studies. The characteristics of incarcerated domestic criminals are reviewed in Part VI; a discussion of efforts to help victims and decrease the level of domestic violence is provided in Part VII. Notes, suggested additional readings, and a bibliography are included.

This Provider's Guide introduces a comprehensive and developmentally appropriate treatment program,, Pathways for Self-Discovery and Change (PSDC), which provides the specific tools necessary for improving evaluation and treatment of at-risk youth, a particularly vulnerable patient population in the justice system. Using an adolescent-focused format, this protocol identifies psychological, biological, and social factors that contribute to the onset of adolescent deviance, and establishes guidelines for delivery of a 32-session treatment curriculum designed to rehabilitate both male and female adolescents with co-occurring substance abuse and criminal conduct. Now in its Second Edition, this guide provides treatment practitioners, program evaluators, and youth services administrators with the most up to date, comprehensive, and accessible information for the treatment and rehabilitation of juvenile justice clients. It is built on theoretical and research advances in the treatment and rehabilitation of juvenile justice clients, as well as feedback over the past seven years from PSDC counselees, treatment providers, and program administrators.

Over the last century, medicine has come out of the black bag and emerged as one of the most dynamic and advanced fields of development in science and technology. Today, biomedical engineering plays a critical role in patient diagnosis, care, and rehabilitation. As such, the field encompasses a wide range of disciplines, from biology and physiology

Updated, revised and reorganized, Coon, Mitterer and Martini's PSYCHOLOGY: MODULES FOR ACTIVE LEARNING, 15th Edition includes all-new chapter-specific learning outcomes and formative assessments based on Bloom's taxonomy. It is fully compatible with the new learning outcomes developed by the American Psychological Association. An emphasis on reflection, critical thinking and human diversity illustrates their importance as cross-cutting themes in psychology. In addition, each module cluster includes a full module devoted to skill development, highlighting skills that will help learners succeed both personally and professionally. The new edition retains the bestseller's engaging style, appealing visuals and detailed coverage of core topics and cutting-edge research. It builds on the proven modular format and on the teaching and learning tools integrated throughout.
