Aquatic Readiness: Developing Water Competence in Young ...

Water competency is influenced by conditions of the aquatic environment (water temperature, movement, depth, clothing, distance, etc.) into which the person may be introduced. Demonstration of skills in one aquatic environment may not transfer to another. ARC SAC Approved January 2013 ARC Scientific Advisory Council Answers – Water

ARC SAC Answers Water Competency

Researches have demonstrated the interest to develop pictorial instrument for assessing fundamental movement skill perceived competence in young children (1). Perceived competence appears appear at least as important as actual competence as it may more directly affect motivation towards an active behavior (2).

Pictorial scale of perceived water competences The ...
