Are you looking for a fun and challenging quiz to tackle solo? Or looking to tackle it with friends and family? Or looking for a big bank of questions for a pub quiz/quiz night? Here's what you will discover with this book: 720 multiple choice questions: Choose from 4 possible answers from each question. Unlike other quiz books we have seen out there - possible answers in The Ultimate Geography Quiz book are meant to be challenging and the possible answers are well researched to truly make you think - see below for more details. Challenging questions throughout: Made to really engage the brain cells, even for the die-hard geographers! Child/Family friendly questions: No sensitive topics are asked about within this book. Keep Score: Optional scoring system to measure your quizzing ability! Matte paperback cover for durability and ease of carrying, so your child can tackle questions at home or on the go. Tackle the quiz alone, with your partner, or make it a social event with your friends and family! Quizzes are great on commutes, and long drives - and equally as great as a social fun event for friends and family. You cannot go wrong with a quiz night! This book makes a perfect gift for adults and children with an interest in geography. Recommend age 12+ Question topics within The Ultimate Geography Quiz include, but not limited to: Country and continent names, size, borders and locations respective to each other. Mountain, mountain heights, mountain range and volcano names and their locations. Ocean, seas, marginal seas, and their locations respective to each other City, building, landmark and capital city names and location. Deserts, forests, jungles, glaciers! Country size, flags, language currency, religion, climate and population. Flag, flag colors, other flag attributes. Physical Geography jargon. World record facts regarding geography. Challenging multiple choice questions: We have seen several quiz books that have a poor selection of multiple choice questions, such as example below... What is the highest mountain in Turkey? A Mt. Whitney B Mt. Everest C Mt. Ararat D Mt. Cook Whilst this question is somewhat tricky in itself, the answers given allow most geographers to eliminate the 3 wrong answers quickly to come up with answer C. Instead of this approach, we have kept the quiz more like shown below to make this strategy of quizzing harder for the challenger... What is the highest mountain in Turkey? A Mt. Elbrus B Mt. Davamond C Mt. Ararat D Mt. Bazarduzu Although it may be easy for some seasoned geographers, this question, by the choices given is harder for the most part, and will hopefully trigger more conversation/thought before answering. Geography is more than just maps and finding your destination. It is about the land, the people on that land, the delicate balance of nature, and our very interdependence upon it, despite the miracles of technology and grocery stores. It's about the effects of nature on places and people, as well as how politics, borders, cities, and towns affect our lives. The Handy Geography Answer Book traces the history of geography from Eratosthenes and Alexander von Humboldt to latitude and longitude, and the latest advances in the Global Positioning System (GPS). It provides insights into economic, social, historic, culture, religious, political, and climate geography, plus oceanography, demographics, and more. Completely revised and updated, it tours the world, its natural features, and the ever-changing mark humans make on our planet, answering 1,200 questions from the trivia (longest, hottest, tallest) to how geography has influenced history, religion, architecture, and the location of cities, including Who first had the idea that there is a magnetic North Pole? What is interesting about Google's "Streetview"? How many people are projected to live on the planet in 2050? Which state has the highest annual divorce rate? What are the largest and smallest counties in the U.S.?

This book reports on the 1994 National Assessment for Educational Progress (NAEP) assessment in geography for grades 4, 8, and 12. Students performance is summarized on a scale ranging from 0 to 500 with the achievement levels of Basic, Proficient and Advanced for each grade. Major findings for the nation include: (1) The Proficient level was reached by 22 percent of fourth graders, 28 percent of eighth graders, and 27 percent of twelfth graders; (2) At each grade level, roughly 70 percent of students were at or above the Basic level; (3) As students' geography scores increased, the complexity and sophistication of the geographic knowledge and skills they exhibited increased; and (4) Generally, students across grades in the higher percentiles exhibited greater abilities to work with a range of geographic tools, create maps based on tabular or narrative data, grasp processes and relationships, bring outside knowledge to bear on answering questions and analyze data. The book contains five chapters. Chapter 1, "NAEP 1994 Assessment in Geography," presents the overview of the NAEP 1994 geography assessment, including its content framework, design, and administration, along with sample questions and student responses from the assessment. Chapter 2, "Geography Results For the Nation and Regions," provides overall average scale score results for the nation, regions, and subgroups of students. Chapter 3, "Geography Achievement Levels," describes student performance in terms of achievement levels. Chapter 4, "Contexts in Which Students Learn Geography," describes contextual factors related to students' geography achievement. Chapter 5, "What Students Know and Can Do in Geography," describes the specific abilities that students demonstrated on the NAEP 1994 geography assessment and reports student performance in different content areas of geography. Three appendices and extensive tables and figures accompany the text. (EH)
