Diesel engines with a Bosch engine management system impress with their maximum dynamic performance and minimal fuel consumption and emissions. Benefits Clean and efficient operation due to quick adaption of all injection parameters

Diesel engine management - Bosch Mobility Solutions

Bosch components such as the engine management system, fuel injection system, and AdBlue <sup>®</sup> injection system were modified. But thorough adjustments were also made to the turbocharger, the catalytic converters, and exhaust-gas recirculation system. During the test drives, numerous parameters were continuously measured and recorded.

Bosch engine management systems offer optimally coordinated system solutions especially for two-wheeler – from small bikes in emerging markets to high-performance bikes Complete electronic engine control, in combination with sophisticated sensors, provides significant benefits over conventional carburetor systems, ranging from intelligently controlled fuel injection to improved emission values

Engine management systems - Bosch Mobility Solutions

Diesel technology has reached a very high level of development, making the diesel engine one of the lesser factors that contribute to CO 2 and particulate pollution. Bosch is working on reducing diesel ' s contribution still further. Nitrogen oxide pollution will in the future likewise hardly be attributable to diesel.
