In the past few decades the number of women entering graduate and professional schools has been going up and up, while the number of women reaching the top rung of the corporate and academic worlds has remained relatively stagnant. Why are so many women falling off the fast track? In this timely book, Mary Ann Mason traces the career paths of the first generation of ambitious women who started careers in academia, law, medicine, business, and the media in large numbers in the 1970s and 80s. Along with her daughter, Mason has written a guide for young women who are facing the tough decision of when—and if—to start a family. It is also a guide for older women seeking a second chance to break through to the next level, as Mason herself did in academia. The book features anecdotes and strategies from the dozens of women they interviewed. Advice ranges from the personal (know when to say "no," the importance of time management) to the institutional, with suggestions for how the workplace itself can be changed to make it easier for ambitious working mothers to reach the top levels. The result is a roadmap of new choices for women facing the sobering question of how to balance a successful career with family. "Lots of excellent advice for women facing different career stages." -BusinessWeek "An interesting look at the real challenges that mothers face in balancing work and family in a variety of professions." -National Review "Must reading for professional women starting families, second chapters or simply trying to break through to the next level. An indispensable guide and realistic cost-benefit analysis of motherhood and women's careers." - Lynn Povich, former Editor-in-Chief of Working Woman magazine

The dual-credit curricular initiative offers high school students the opportunity to earn college and high school credits simultaneously without taking a standardized test to acquire the credit. The courses are purported to introduce students to a more rigorous curriculum in high school and save them time and money in their pursuit of college degrees. Dual credit programs have grown rapidly, and this monograph provides a synthesis of: • the scholarly literature on dual credit offered at high school and a variety of postsecondary settings; • underrepresented students' experiences with the course(s), and • suggestions for future research and drivers that will influence its development. Originally, these initiatives focused on high-achieving students, but additional models have emerged that expand the benefits to lower- and middle-achieving students as well. This is the third issue of the 42nd volume of the Jossey-Bass series ASHE Higher Education Report. Each monograph is the definitive analysis of a tough higher education issue, based on thorough research of pertinent literature and institutional experiences. Topics are identified by a national survey. Noted practitioners and scholars are then commissioned to write the reports, with experts providing critical reviews of each manuscript before publication.
