Traditionally, the American Dream has included owning a house, and until recently that meant the bigger the better. McMansions have flourished in suburbs across the country, and as houses got bigger we filled them with more stuff. Kerri Fivecoat-Campbell had been subconsciously trying to live up to this American Dream when circumstances forced her and her husband into a 480-square foot house in the woods. What was supposed to be a writing cabin and guest house became their full-time abode and they quickly discovered that they had serendipitously discovered a better way of life. They realized that by living smaller, they were in fact, Living Large. They were not spending extra time cleaning and maintaining the house, but had the freedom to pursue their hobbies; they did not waste money on things

they didn't need; and they grew emotionally (as well as physically) closer. Kerri and her husband realized that Living Large is less about square footage and more about a state of mind. As Kerri relates the story of her transformation to a "Living Larger," she also profiles more than a dozen other families living tiny house lives and offers practical advice for how you can too. The book will: *walk you through the financial advantages of small space living *help you define and find the right size house *teach you to scale down to the essentials to be surrounded only by things you love *show you how to make use of outdoor space *give tips on how to decorate judiciously and much more. Whether readers are inspired to join the tiny house movement or not, they are sure to be inspired to Live Large with less.

Provides a review of social trends and their effect on architecture and design.

A smart, provocative look at how the American Dream of single-family homes, white picket fences and two-car garages became a lonely, overpriced nightmare, and how new trends in housing can help us live better. Over the past century, American demographics and social norms have shifted dramatically. More people are living alone, marrying later in life, and having smaller families. At the same time, their lifestyles are changing, whether by choice or by force, to become more virtual, more mobile, and less stable. But despite the ways that today's America is different and more diverse, housing still looks

stuck in the 1950s. In *Brave New Home*, Diana Lind shows why a country full of single-family houses is bad for us and our planet, and details the new efforts underway that better reflect the way we live now, to ensure that the way we live next is both less lonely and more affordable. Lind takes readers into the homes and communities that are seeking alternatives to the American norm, from multi-generational living, in-law suites, and co-living to microapartments, tiny houses, and new rural communities. Drawing on Lind's expertise and the stories of Americans caught in or forging their own paths outside of our cookie-cutter housing trap, *Brave New Home* offers a diagnosis of the current crisis in American housing and a radical re-imagining of the possibilities of housing.

Prefabulous and Sustainable dispels the negative myths associated with prefab homes and shows the reader how beautiful and remarkably green prefab homes are. In this guide to prefab home-building author Sheri Koones, demystifies the prefabricated house by using 25 unique homes to showcase how factory-built homes are greener, more efficient, sturdier, and more cost-effective than site-built homes. The book is divided into 3 categories—green, greener, greenest—and the homes featured vary in style, design, type of construction, and size. All of the homes included in *Prefabulous and Sustainable* have been customized

to create a level of sustainability beyond the inherent qualities of prefab. Written in an easy to understand and approachable style, author Sheri Koones walks the readers through each of the homes, explaining the materials, strategies, and systems used to create a sustainable living environment. Photographs, captions, floor plans, and sidebars illustrate to readers that green living is not as complicated as one might think, and attainable for everyone. Also included is a resource guide, making this book a hand-on guide for homebuilders. Praise for Prefabulous + Sustainable “Authoritative and beautiful. Once again, Koones builds her case for pre-fab thoroughly, and presents it in a compelling, well-organized package.” –Allen Norwood, NAREE Book Competition Head Judge

Throughout history, some books have changed the world. They have transformed the way we see ourselves - and each other. They have inspired debate, dissent, war and revolution. They have enlightened, outraged, provoked and comforted. They have enriched lives - and destroyed them. Now Penguin brings you the works of the great thinkers, pioneers, radicals and visionaries whose ideas shook civilization and helped make us who we are. Thoreau's account of his solitary and self-sufficient home in the New England woods remains an inspiration to the environmental movement - a call to his fellow men to abandon their striving, materialistic existences of 'quiet desperation' for a simple life within their means, finding spiritual truth through awareness of the sheer beauty of their surroundings.
