When it comes to learning linear algebra, engineers trust Anton. The tenth edition presents the key concepts and topics along with engaging and contemporary applications. The chapters have been reorganized to bring up some of the more abstract topics and make the material more accessible. More theoretical exercises at all levels of difficulty are integrated throughout the pages, including true/false questions that address conceptual ideas. New marginal notes provide a fuller explanation when new methods and complex logical steps are included in proofs. Small-scale applications also show how concepts are applied to help engineers develop their mathematical reasoning.

A whimsical and “devastatingly effective” (Washington Post) collection that captures the spirit of travel and pays homage to heritage. In his fourth collection, a breakthrough volume, Major Jackson appropriates the vernacular notion of “rolling deep” to capture the spirit of aesthetic travel that defines these forceful new poems and brazenly announces his steady accretion of literary and artistic influences, both formal and experimental—his “crew.” The confident and radiant poems in Roll Deep address a range of topics, most prominently human intimacy and war. And like his best work to date, these poems create new experiences with language owed to Jackson’s willingness to once again seek a rhythmic sound that expresses the unique realities of the twenty-first century with humor and understanding. Whether set in Nairobi, Madrid, or Greece, the poems are sensuously evocative and unapologetically with-it, in their effort to build community across borders of language and style. From Urban Renewal, “The Dadaab Suite”: I have come to Dadaab like an actor on a press release, unprepared for the drained faces of famine-fleeing refugees, my craft’s glamour dimmed by hundreds of infant graves, children whose lolling heads “final drop landed on their mothers’” backs like soft stones. What beauty can I spell in this swelter of dust?
