An illustrated monthly magazine in the interest of better art, better work and a better more reasonable way of living.

From 1930 to 1968, General Motors sponsored a 1:12 scale model automobile design competition for youth—the famous Fisher Body Craftsman's Guild. Each year thousands of boys and young men from across America competed for scholarships by designing, building, and submitting a scale model of their own "dream car," to be judged on such qualities as design originality and craftsmanship. A public relations bonanza for GM, the program helped to identify and nurture a generation of future leaders in design engineering, automotive design, automotive styling, industrial design and other endeavors. In these essays, more than 30 Guildsmen chronicle their experiences in the competition, revealing their model car design techniques, tricks, and secrets: Philip J. Rauth, Joseph R. Rauth, Herman I. Craftsman Farms was the country estate of the father of the American Arts and Crafts movement, Gustav Stickley. Though Stickley is credited with creating hundreds of home designs, this property contains the only home he designed and built for his own use. His rustic log house was built upon a rolling hillside surrounded by lawns, stone walls, and working farmland. In September 1917, the property was purchased by Sylvia and George Farny, who loved it dearly and passed it on to their descendants. Portions of the 650 acres were sold, but the core remained intact until the 1980s, when it was threatened by condominium development. Community activists launched a "Save the Farms" campaign, which led to the Township of
