Worshipped by 2 billion Christians worldwide, Jesus Christ is the most famous human being ever. Stephen Tomkins takes the reader on a enlightening and enjoyable journey through the key stages of Christian development, covering the people, the events, the movements, the controversies and the expansion of the Church in this lively 'warts and all' portrait. The book begins with the life of Jesus before looking at the spread of the early church and the Roman Empire. Tomkins then continues the story of Christianity right up to the present day, including discussion of topics such as: the Eastern church, battles between East and West, the Reformation, the Counter-Reformation, the Enlightenment and the impact of science. The author also provides a snapshot of the worldwide church of the 21st century and explores the challenges it faces.

Ecologies of Faith in New York City examines patterns of interreligious cooperation and conflict in New York City. It explores how representative congregations in this religiously diverse city interact with their surroundings by competing for members, seeking out niches, or cooperating via coalitions and neighborhood organizations. Based on in-depth research in New York's ethnically mixed and rapidly changing neighborhoods, the essays in the volume describe how religious institutions shape and are shaped by their environments, what new roles they have assumed, and how they relate to other religious groups in the community.

Women have been central to the work of Christian ministry from the time of Jesus to the twenty-first century. Yet the story of Christianity is too often told as a story of men. This accessibly written book tells the story of women throughout church history, demonstrating their integral participation in the church's mission. It highlights the legacies of a wide variety of women, showing how they have overcome obstacles to their ministries and have transformed cultural constraints to spread the gospel and build the church.

Church historians have long known and appreciated Christianity's global history. Until recently, however, introductory textbooks on the history of Christianity focused almost exclusively on Europe and North America. Robert Bruce Mullins's *A Short World History of Christianity*, by contrast, offers a panoramic picture of the history of Christianity in its Western and non-Western expressions. It tells the story of the early church in the Greek East as well as the Latin West; of Christianity's spread into Asia as well as Europe during the Middle Ages; and its explosion around the world during the modern period. Mullins's highly readable narrative explores why global perspectives have emerged so strongly in our understanding of the story of Christianity and how they have impacted Christianity's perspective on its place in the world. This newly revised edition adds information on such global phenomena as early Syriac-speaking Christianity; the growth of Pentecostalism around the world, especially in the southern hemisphere; and recent trends in Christianity, including the elevation of the first pope born in the Americas. A time line of key dates, call-out boxes, and other helpful study materials are also provided. Beginning students will appreciate this memorable introduction to the most important events in the history and development of Christianity.
