If you want the object to follow a more interesting path, you can use a motion guide to steer it. To create a motion guide: Motion-tween an object from one point to another. (Motion guides don't work with shape tweens.) It doesn't matter where the object starts and ends; you'll adjust that later. Select the layer in the Timeline that contains the tweened object, and click the Add Motion Guide icon . A new layer appears, with the layer you selected indented beneath it.
