Recommended gear oil change intervals if you use your car for towing or driving in muddy or otherwise severe conditions, vary between 30,000 and 50,000 miles. For normal driving conditions some car manufacturers recommend changing gear oil every 60,000-80,000, while others advise inspecting the gear oil at regular services and change if dirty.

[How often should gear oil be changed? | Testing Autos](#)

If you regularly tow, drive in low traction conditions, or drive in mountainous regions, you will likely need to change your gear oil every 30,000 miles, or potentially after even less. In normal driving conditions, most cars can hit up to 80,000 miles before needing a gear oil change. However, this number is a maximum, and most manufacturers recommend changing your gear oil between 50,000 and 60,000 miles.
