Hidrostal pumps have a special connection to perform a shaft liquid sealing in the stuffing box. If the pumped fluid is clean and contains no abrasive particles, the connection can be performed from the pump discharge. If the fluid contains abrasive particles another source of clean fluid must be slightly higher than the pump discharge pressure.

The basic system comprises of a vacuum pump, a ball type non-return valve fitted to the pump discharge, and a Priming Chamber mounted to the suction side of the Hidrostal Pump. A connection is taken from the chamber to the electric vacuum pump. The vacuum pump operation monitors the level in the chamber. An automatic shut off valve, which

~~Pioneers In Pump Technology~~

Hidrostal pumps are built around the unique hydraulic action of a Hidrostal impeller that delivers a long slow turn from the axial to the radial direction. This coupled with a large free passage provides a unique combination of hydraulic characteristics with a good hydraulic efficiency. High Solids Handling Capability

File Type PDF Hidrostral Pump Manual

Written by an experienced engineer, this book contains practical information on all aspects of pumps including classifications, materials, seals, installation, commissioning and maintenance. In addition you will find essential information on units, manufacturers and suppliers worldwide, providing a unique reference for your desk, R&D lab, maintenance shop or library. * Includes maintenance techniques, helping you get the optimal performance out of your pump and reducing maintenance costs * Will help you to understand seals, couplings and ancillary equipment, ensuring systems are set up properly to save time and money * Provides useful contacts for manufacturers and suppliers who specialise in pumps, pumping and ancillary equipment
