The bystander effect, or bystander apathy, is a social psychological theory that states that individuals are less likely to offer help to a victim when there are other people present. First proposed in 1964, much research, mostly in the lab, has focused on increasingly varied factors, such as the number of bystanders, ambiguity, group cohesiveness, and diffusion of responsibility that reinforces mutual denial. The theory was prompted by the murder of Kitty Genovese about which it was wrongly rep

Recounts the events of March 13, 1964, when a young woman in Queens was slain in plain sight of witnesses who heard her cries for help but chose not to get involved.

A Pulitzer Prize-winning journalist's groundbreaking account of the crime that shocked New York City—and the world In the early hours of March 13, 1964, twenty-eight-year-old Catherine "Kitty" Genovese was stabbed to death in the middle-class neighborhood of Kew Gardens, Queens. The attack lasted for more than a half hour—enough time for Genovese's assailant to move his car and change hats before returning to rape and kill her just a few steps from her front door. Yet it was not the brutality of the murder that made it international news. It was a chilling detail Police Commissioner Michael Joseph Murphy shared with A. M. Rosenthal of the New York Times: Thirty-eight of Genovese's neighbors witnessed the assault—and none called for help. To Rosenthal, who had recently returned to New York after spending a decade overseas and would become the Times's longest-serving executive editor, that startling statistic spoke volumes about both the turbulence of the 1960s and the enduring mysteries of human nature. His impassioned coverage of the case sparked a firestorm of public indignation and led to the development of the psychological theory known as the "bystander effect." Thirty-Eight Witnesses is indispensable reading for students of journalism and anyone seeking to learn about one of the most infamous crimes of the twentieth century.

Presents a narrative account of the notorious 1964 Queens, New York murder of Kitty Genovese, in which several witnesses failed to help or call the police until after the event, and the aftermath of the crime for those involved, and the country as a whole.

In "No One Helped" Marcia M. Gallo examines one of America's most infamous true-crime stories: the 1964 rape and murder of Catherine "Kitty" Genovese in a middle-class neighborhood of Queens, New York. Front-page reports in the New York Times incorrectly identified thirty-eight indifferent witnesses to the crime, fueling fears of apathy and urban decay. Genovese's life, including her lesbian relationship, also was obscured in media accounts of the crime. Fifty years later, the story of Kitty Genovese continues to circulate in popular culture. Although it is now widely known that there were far fewer actual witnesses to the crime than was reported in 1964, the moral of the story continues to be urban apathy. "No One Helped" traces the Genovese story's development and resilience while challenging the myth it created. "No One Helped" places the conscious creation and promotion of the Genovese story within a changing urban environment. Gallo reviews New York's shifting racial and economic demographics and explores post-World War II examinations of conscience regarding the horrors of Nazism. These were important factors in the uncritical acceptance of the story by most media, political leaders, and the public despite repeated protests from Genovese's Kew Gardens neighbors at their inaccurate portrayal. The crime led to advances in criminal justice and psychology, such as the development of the 911 emergency system and numerous studies of bystander behaviors. Gallo emphasizes that the response to the crime also led to increased community organizing as well as feminist campaigns against sexual violence. Even though the particulars of the sad story of her death were distorted, Kitty Genovese left an enduring legacy of positive changes to the urban environment.

In the early 1960s, the quiet borough of Queens was rocked by the violent and brutal murders of Barbara Kralik, Annie Mae Johnson, and Kitty Genovese. These murders shocked not only Queens and New York, but the entire nation, especially when newspapers disclosed Kitty?s neighbors heard her screams and looked on without calling the police. Two suspects were apprehended and indicted, Winston Moseley for the Genovese murder and Alvin Mitchell for the Kralik murder. Before the trials, Moseley claimed to have committed the Kralik and Johnson murders as well, not taken seriously by the police and DA until Moseley disclosed details only the actual killer could have known. Charles Skoller, the young prosecutor assigned to these trials was now faced with a prosecutor?s nightmare. In Twisted Confessions, he details the murders and relives his investigations and trials that followed in the almost impossible task of revealing and convicting the actual killer.

A research study into the factors that influence bystander intervention in emergencies

Now and then, we hear about everyday heroes riding to the rescue when they see someone suffering or being harassed. But most bystanders don't intervene. Catherine Sanderson turns to cutting-edge research in social psychology and neuroscience to explain why we so often fail to act and offers practical strategies to nudge us into being brave.

A New York Times bestseller!
Written in a flowing narrative style, Kitty Genovese: A True Account of a Public Murder and Its Private Consequences presents the story of the horrific and infamous murder of Kitty Genovese, a young woman stalked and stabbed on the street where she lived in Queens, New York, in 1964. The case sparked national outrage when the New York Times revealed that dozens of witnesses had seen or heard the attacks on Kitty Genovese and her struggle to reach safety but had failed to come to her aid—or even call police until after the killer had fled. This book, first published in 2014 and now with a new afterword, cuts through misinformation and conjecture to present a definitive portrait of the crime, the aftermath, and the people involved. Based on six years of research, Catherine Pelonero's book presents the facts from police reports, archival material, court documents, and firsthand interviews. Pelonero offers a personal look at Kitty Genovese, an ambitious young woman viciously struck down in the prime of her life; Winston Moseley, the killer who led a double life as a responsible family-man by day and a deadly predator by night; the consequences for a community condemned; and others touched by the tragedy. Beyond just a true-crime story, the book embodies much larger themes: the phenomenon of bystander inaction, the evolution of a serial killer, and the fears and injustices spawned by the stark prejudices of an era, many of which linger to this day.

'Fantastic ... It explains the misperception of stacked odds and personal powerlessness that stops individuals challenging bad behaviour. Stunning. Humbling. Thought-provoking' Kathryn Mannix, author of With the End in Mind
In the face of discrimination, bad behaviour, evil and abuse, why do good people so often do nothing?
