Stock Market Language - Top Trading Directory

A stock yield is calculated by dividing the annual dividend by the stock's current market price. For example, a stock selling at \$50 and with an annual dividend of \$5 per share yields 10%. A bond yield is a more complicated calculation, involving annual interest payments, plus amortizing the difference between its current market price and par value over the life of the bond.

The Stock Market. In conversation, media, and the news, it's common to hear talk of "the market," short for the stock market. And while most everyone knows about the stock market, once again, few actually know what it is, how it functions, and what purposes it serves. The stock market is the platform through which shares - or pieces of ownership of a company - are bought and sold by investors; investors who own shares of a company are referred to as shareholders.

The Stock Market - Business English Lesson

Like most professions, the stock market has a language all of its own. Below is some important terminology which you should know. 1. Bull or bear - A bear market is a falling market whilst a bull market is a rising market. Similarly, a speculator who has the view that the market or a specific share will fall in price is referred to as a 'Bear', and one who has the view that the market or a specific share will rise in price is referred to as a 'Bull'.

Essay from the year 2014 in the subject Business economics - Investment and Finance, grade: 15,0, University of St Andrews (School of Management), course: Corporate Finace, language: English, abstract: Stock market crashes had occurred in the financial market since the very beginning and in every generation. "Greed, hubris and systemic fluctuations have given us the Tulip Mania, the South Sea bubble, the land booms in the 1920s and 1980s, the U.S. stock market and great crash in 1929, the October 1987 crash, to name just a few of the hundreds of ready examples". This essay will compare and contrast the last three major stock market crashes in 1987, 2000 and 2007. To do this, the essay will pay special emphasis on the causes of the three crashes. From there the essay will draw out the similarities and differences and will answer the question if boom and bust can be predicted.
