Solutions can be separated into its original components.

However, unlike mixtures, solutions can be separated by evaporation. For example: the water and salt solution will evaporate as the solution is heated.

The water will change from liquid to gas as the water-salt solution

How to make a mixture. You can make your own mixtures with items from around the house. 1. Firstly try to make a mixture of toys. 2. This time use cereals or sweets.

What is a solution? A solution is made when a solid (which we call

File Type PDF

Mixtures And

Solutions) dissolves into a liquid (that we call the solvent) One example of a solution is salt dissolved in water.
