For any organization to compete successfully in today's market, it must focus on building not only from the outside but from the inside as well. Shows the correlation between successful people management and the bottom line. Explains how involving employees in the planning and

implementation process and allowing them to see the fruits of their labor (the sense of connection between daily work and long-term customer success) benefits the organization. The aim here is to show how focusing on organizational capability will not only meet short-term financial requirements, but also build a solid foundation for the future.

Proposes that video communications tools are a form of infrastructure that enhance the creation of new knowledge which transcends space and time in business activities. Illustrates that the dynamic relationship of four elements of ICT capability promote the formation of business networks and the development of knowledge communities.

Helps managers to understand how their organisations' performance could be improved. Presents an overview of the advice on organisational improvement facing managers. Classifies and evaluates various different approaches. Highlights the relationships between strategy and capability.

Describes how organizations must change to compete in the information age

Transform Your Organization by Scaling Leadership How do senior leaders, in their own words, describe the most effective leaders—the ones that get results, grow the business, enhance the culture and leave in their wake a trail of other really effective leaders? Conversely, how do senior leaders describe the kind of leader that undercuts the organization's capacity and capability to create its future? This book, based on groundbreaking research, shows how senior leaders describe and develop leadership that works, that does not, that scales, and that limits scale. Is your leadership built for scale as you advance in today's volatile, uncertain, dynamic, and disruptive business environment? This context puts a premium on a very particular kind of leadership—High-Creative leadership capable of rapidly growing the organization while simultaneously transforming it into more agile, innovative, adaptive and engaging workplace. The research presented in this book suggests that senior leaders can describe the High-Creative leadership with surprising clarity. They also describe with equal precision the High-Reactive leadership that cancels itself out and seriously limits scale. Which type of leader are you? You scale your leadership by increasing the multiple on your leadership in three ways. First, by developing the strengths that differentiate the most effective leaders from the strengths deployed by the most Reactive and ineffective leaders. And second, by increasing your leadership ratio—the ratio of most the effective strengths to the most damaging liabilities. Third, by developing High-Creative leaders all around you. Scaling Leadership provides a proven framework for magnifying agile and scalable leadership in your organization. Scalable leadership drives forward-momentum by multiplying high-achieving leaders at scale so that growth, productivity and innovation increase exponentially. Creative leaders multiply their strengths beyond technical competence by leading in deep relationship, with radical humanity, passion and integrity. Drawing upon decades of solid research and experience enhancing individual capability and collective leadership effectiveness with Fortune 500 companies and government agencies, the authors provide an innovative and efficient framework to help you: Take stock of your own personal balance of leadership strengths and weaknesses Scale your leadership in deep relationship and high integrity Proliferate high-achievers throughout your organization's leadership system Identify ineffective leadership and course-correct quickly Transform your organization by transforming leadership Scaling Leadership is an invaluable tool for executives, managers, and leaders in business, academia, nonprofit organizations, and more. This innovative resource provides effective techniques, real-world examples, and expert guidance for organizations seeking to improve performance, align and execute strategies, and transform their business with scalable leadership capability.

A member of the AWL OD Series! This text focuses on how firms can create a competitive advantage by building lateral capability so they can respond flexibly in an uncertain world. It addresses international coordination and cross business unit coordination, as well as the usual cross functional efforts.

In an age of intense international competition, enterprises, regions and nations depend on their organizational capabilities to gain competitive advantage in global markets. This volume brings together critical scholarly contributions to historical and contemporary debates over the origins and characteristics of organizational capabilities that result in competitive advantage. Included are case studies drawn from textiles, chemicals, automobiles, computers and agriculture that illustrate how organizational capabilities generate sustained competitive success. In a new introduction, the editors, who have themselves been in the forefront of analysing the dynamics of innovation and industrial development, provide a state-of-the-art survey of the subject.

As David A. Nadler and Michael L. Tushman show, the last remaining source of truly sustainable competitive advantage lies in "organizational capabilities": the unique ways each organization structures its work, builds its cultures, and motivates its people to achieve clearly articulated aspirations and strategic objectives.

New competitive realities have ruptured industry boundaries, overthrown much of standard management practice, and rendered conventional models of strategy and growth obsolete. In their stead have come the powerful ideas and methodologies of Gary Hamel and C.K. Prahalad, whose much-revered thinking has already engendered a new language of strategy. In this book, they develop a coherent model for how today's executives can identify and accomplish no less than heroic goals in tomorrow's marketplace. Their masterful blueprint addresses how executives can ease the tension between competing today and clearing a path toward leadership in the future.
