The effective management of plants is fundamental to all agricultural enterprise, making plant science a key discipline for all growers. This book provides an integrated explanation of all aspects of plant structure and function for students of agriculture, horticulture and applied biology, with the aim of highlighting the practical relevance of plant science to agriculture. Each chapter is self-contained and self-explanatory, with specific chapters covering energy, water, minerals, structure, growth and development from sowing to harvest, environmental effects and controls, breeding, vegetative propagation, field production and yield, and the nutritional content of produce. Taken as a whole, *Plants in Agriculture* fulfills the need for a single text which promotes a comprehensive understanding of how plants operate in agriculture.

This three-part course takes into account recent syllabus changes and provides a base for the CXC examination.

Management syllabuses, for first examination in 2019. Cambridge IGCSE® and O Level Environmental Management Coursebook is tailored to the IGCSE (0680) and O Level (5014) Environmental Management syllabuses for first examination in 2019, and is endorsed for full syllabus coverage by Cambridge International Examinations. The coursebook comprehensively covers the knowledge and skills required and supports students as they prepare for assessment. International case studies illustrate phenomena in real-world situations, while practical activities help students to develop their investigative skills. Exam-style questions and self-assessment questions encourage students to check their understanding and progress. Answers to all questions can be found at the back of the book.

Soil organic matter - the product of on-site biological decomposition - affects the chemical and physical properties of the soil and its overall health. Its composition and breakdown rate affect: the soil structure and porosity; the water infiltration rate and moisture holding capacity of soils; the diversity and biological activity of soil organisms; and plant nutrient availability. This document concentrates on the organic matter dynamics of cropping soils and discusses the circumstances that deplete organic matter and their negative outcomes. It then moves on to more proactive solutions. It reviews a "basket" of practices in order to show how they can increase organic matter content and discusses the land and cropping
