Advances in Materials and  
Pavement Performance  
Prediction contains the  
papers presented at the  
International Conference on  
Advances in Materials and  
Pavement Performance  
Prediction (AM3P, Doha,  
Qatar, 16- 18 April 2018).  
There has been an increasing  
emphasis internationally in  
the design and construction  
of sustainable pavement  
systems. Advances in  
Materials and Pavement  
Prediction reflects this  
development highlighting  
various approaches to  
predict pavement  
performance. The  
contributions discuss links  
and interactions between

material characterization methods, empirical predictions, mechanistic modeling, and statistically-sound calibration and validation methods. There is also emphasis on comparisons between modeling results and observed performance. The topics of the book include (but are not limited to):

- Experimental laboratory material characterization
- Field measurements and in situ material characterization
- Constitutive modeling and simulation
- Innovative pavement materials and interface systems
- Non-destructive measurement techniques
- Surface
