PHILOSOPHY OF RESEARCH METHODOLOGY

This section deals with the philosophy of research and research methodology. Methodology underpins all the work you do. These are important concepts which need to be understood, but they 're one of the areas people find most challenging, so don ' t worry if they don ' t sink in right away.

Philosophy of Research - SAGE Research Methods

A research philosophy is a belief about the way in which data about a phenomenon should be gathered, analysed and used. The term epistemology (what is known to be true) as opposed to doxology (what is believed to be true) encompasses the various philosophies of research approach.

Chapter Three: Research Methodology

Research philosophy is an important part of research methodology. Research philosophy is classified as ontology, epistemology and axiology. These philosophical approaches enable to decide which approach should be adopted by the researcher and why, which is derived from research questions (Saunders, Lewis, & Thornhill, 2009).

Understanding research philosophy - Project Guru

Interpretive research approaches are derived from research philosophy that is adopted. According to Dumke (2002) the two main research approaches are deductive and inductive. The inductive approach is commonly referred to when theory is derived from observations. Thus, the research begins with a specific observation and measures.

Chapter 3 – Methodology (example) - Research Prospect

SAGE Research Methods is a research methods tool created to help researchers, faculty and students with their research projects. SAGE Research Methods links over 175,000 pages of SAGE 's renowned book, journal and reference content with truly advanced search and discovery tools. Researchers can explore methods concepts to help them design research projects, understand particular methods or identify a new method, conduct their research, and write up their findings.

An Introduction to the Philosophy of Methodology | SAGE ...

Realism Research Philosophy. Realism research philosophy relies on the idea of independence of reality from the human mind. This philosophy is based on the assumption of a scientific approach to the development of knowledge. Realism can be divided into two groups: direct and critical. Direct realism, also known as naive realism, can be described as “ what you see is what you get ” [1].
