Presents a collection of fifty profiles of individuals, both famous and unsung, who are struggling to make a difference in the world, including Nelson Mandela, the Dalai Lama, Helen Prejean, Desmond Tutu, and Elie Wiesel.

Twent-six years before the #metoo movement, Anita Hill sparked a national conversation about sexual harassment in the workplace when she testified against Clarence Thomas. After her astonishing testimony in the Clarence Thomas hearings, Anita Hill ceased to be a private citizen and became a public figure at the white-hot center of an intense national debate on how men and women relate to each other in the workplace. That debate led to ground-breaking court decisions and major shifts in corporate policies that have had a profound effect on our lives--and on Anita Hill's life. Now, with remarkable insight and total candor, Anita Hill reflects on events before, during, and after the hearings, offering for the first time a complete account that sheds startling new light on this watershed event. Only after reading her moving recollection of her childhood on her family's Oklahoma farm can we fully appreciate the values that enabled her to withstand the harsh scrutiny she endured during the hearings and for years afterward. Only after reading her detailed narrative of the Senate Judiciary proceedings do we reach a new understanding of how Washington--and the media--rush to judgment. And only after discovering the personal toll of this wrenching ordeal, and how Hill copes, do we gain new respect for this extraordinary woman. Here is a vitally important work that allows us to understand why Anita Hill did what she did, and thereby brings resolution to one of the most controversial episodes in our nation's history.

One of the foremost experts in public policy here attempts not only to describe what public policy is, but given societal changes in the last two decades, to account for its present status. To learn from the past in order to establish public policy as a discipline in its own right, Wildavsky traces its motifs from their beginnings in the 1960s to the 1980s. Starting from the premise that there has been growing polarization of political elites, he shows how public policy as a field has had to face increased politicization. For Wildavsky, the field of public policy needs to incorporate more awareness of the human aspects of policy making: he emphasizes the political choices to be made in a competitive environment and the social relations that sustain them. When the first specialist schools devoted solely to public policy came into existence in the 1960s, the programs of the Great Society were their main impetus. With the disillusionment and failure of the Great Society, the identity of public policy became transformed. New theoretical issues had to be addressed. In this volume, Wildavsky provides a foundation for the theory no less than

the practice of policy-making. Aaron Wildavsky is professor of political science, University of California, Berkeley. He founded the School of Public Policy there, and is presently its Director. He was formerly Director of the Russell Sage Foundation. He was the President of the American Political Science Association for the years 1986-1987.

Through public appearances, radio and television interviews, and his many articles and books, Manning Marable has become one of America's most prominent commentators on race relations and African-American politics. *Speaking Truth to Power* brings together for the first time Marable's major writings on black politics, peace, and social justice. The book traces the changing role of race within the American political system since the Civil Rights Movement. It also charts the author's striking evolution of political ideas, moving toward a political analysis of multicultural democracy, social justice, and egalitarian pluralism.

Domestic drug enforcement takes many forms, from the rural patrol officer who happens upon a small-scale mobile "shake and bake" methamphetamine lab during a routine traffic stop, to the city narcotics detective who initiates a low-level buy-bust operation that nets a few hits of crack cocaine on the street corner, to the local, state, and federal agents working in multiagency task forces that coordinate a sting operation that nets thousands of kilos of near-pure cocaine being transported by tractor-trailer. Regardless of the form, there is a high probability that these authorities have exploited access to known offenders and exerted pressure on those individuals to gather inside information on illicit drug sales. These confidential informants provide intelligence on the inner workings of drug operations in exchange for leniency or remuneration, providing a relatively cheap source of intelligence that fuels much of the ongoing war on drugs. In other instances, law enforcement authorities will reach out to members of the criminal underworld who are willing to provide valuable intelligence in exchange for money. Despite the central role of informants in contemporary police operations, little is known about the shadowy relationships among law enforcement, snitches, and offenders. Based on ethnographic fieldwork in the narcotics, homicide, and street-level vice operations in two major metropolitan police departments, *Speaking Truth to Power* takes readers to the front lines of the war on drugs to unravel this complex web of information exchange.

"Symone's honest and profound reflection on standing up and speaking out is sure to inspire young people across the country to become the change agents the world needs." – Congresswoman Maxine Waters In this rousing call to leadership, the self-described millennial spokesperson for the culture, CNN's designated "woke AF" former commentator, and the youngest national press secretary in the history of the United States shares her take-no-prisoners approach to life,

politics, and career success, and shows a new generation how to be loud and powerful in their own right. Many people—most notably white older men—may try to stop Symone Sanders from speaking up and out. But Symone will NOT shut up. And neither should you. In this inspiring call-to-action, Symone tells stories from her own life of not-shutting-up alongside loud young revolutionaries who came before her to help you find your authentic voice and use it to your advantage; to fight ideological battles more effectively; and to resist those who try to silence you. We are all gurus, masterminds, artists, entrepreneurs—we are the change agents we have been waiting for. IT IS US. And the time is RIGHT NOW. I know you're wondering, "But HOW?" And we don't have all the answers! Symone is the first to admit we're all winging it in one way or another. But the point is we're out there doing it. So get started. Open your mouth and start talking. Loudly. No You Shut Up goes beyond the surplus of "Vote-Or-Die" books we've seen before. Because change doesn't just happen at the ballot box. We need people fighting oppression, injustice, and inequality—in the workplace, on the cultural battlefield, in government, in every corner of the world. With spirited storytelling filtered through a voice that cannot and will not be ignored, Symone inspires you to start now. You don't need to have all the answers, or wait your turn to help create the change you want to see. All you need is a new toolbox, an unshakable commitment, and the confidence and guidance to wield those tools effectively.

The Human Rights Act is now in force. Any NHS body that acts in a way that is incompatible with the rights set out in the European Convention on Human Rights may be acting unlawfully. This workbook is a personal perspective based on the authors' experience of health service management and the law. It explains the impact of the Act, raises issues surrounding its implementation, and asks questions about its implications for the future. It has practical exercises to help readers respond to the challenges of the Act, individually or in team sessions. The Human Rights Act and The European Convention on Human Rights are reproduced in full. There is a great deal in the Act that will have subtle implications for how and when health care is provided and for many of the assumptions that are taken for granted.

Online discourse has created a new media environment for contributions to public life, one that challenges the social significance of the role of public intellectuals—intellectuals who, whether by choice or by circumstance, offer commentary on issues of the day. The value of such commentary is rooted in the assumption that, by virtue of their training and experience, intellectuals possess knowledge—that they understand what constitutes knowledge with respect to a particular topic, are able to distinguish it from mere opinion, and are in a position to define its relevance in different contexts. When intellectuals comment on matters of public concern, they are accordingly presumed to speak truth, whether they are writing books or op-ed columns or appearing as guests on radio and television news programs. At the same time, with increasing frequency, discourse on public life is taking place online. This new digital environment is characterized by abundance—an abundance of speakers, discussion, and access. But has this abundance of discourse—this democratization of knowledge, as some describe it—brought with it a corresponding increase in truth? Casting doubt on the assertion that online discourse, with its proliferation of voices, will somehow yield collective wisdom, *Speaking Power to Truth* raises concerns that this wealth of digitally enabled commentary is, in fact, too often bereft of the hallmarks of intellectual discourse: an epistemological framework and the provision of evidence to substantiate claims. Instead, the pursuit of truth finds itself in competition with the quest for public reputation, access to

influence, and enhanced visibility. But as knowledge is drawn into the orbit of power, and as the line between knowledge and opinion is blurred, what role will the public intellectual play in the promotion and nurturing of democratic processes and goals? In exploring the implications of the digital transition, the contributors to *Speaking Power to Truth* provide both empirical evidence of, and philosophical reflection on, the current and future role of the public intellectual in a technologically mediated public sphere. Contributions by Barry Cooper, Jacob Foster, Karim-Ally Kassam, Boaz Miller, Liz Pirnie, and Eleanor Townsley.

For at least two decades the career of Edward Said has defined what it means to be a public intellectual today. Although attacked as a terrorist and derided as a fraud for his work on behalf of his fellow Palestinians, Said's importance extends far beyond his political activism. In this volume a distinguished group of scholars assesses nearly every aspect of Said's work—his contributions to postcolonial theory, his work on racism and ethnicity, his aesthetics and his resistance to the aestheticization of politics, his concepts of figuration, his assessment of the role of the exile in a metropolitan culture, and his work on music and the visual arts. In two separate interviews, Said himself comments on a variety of topics, among them the response of the American Jewish community to his political efforts in the Middle East. Yet even as the Palestinian struggle finds a central place in his work, it is essential—as the contributors demonstrate—to see that this struggle rests on and gives power to his general "critique of colonizers" and is not simply the outgrowth of a local nationalism. Perhaps more than any other person in the United States, Said has changed how the U.S. media and American intellectuals must think about and represent Palestinians, Islam, and the Middle East. Most importantly, this change arises not as a result of political action but out of a potent humanism—a breadth of knowledge and insight that has nourished many fields of inquiry. Originally a special issue of *boundary 2*, the book includes new articles on minority culture and on orientalism in music, as well as an interview with Said by Jacqueline Rose. Supporting the claim that the last third of the twentieth century can be called the "Age of Said," this collection will enlighten and engage students in virtually any field of humanistic study.
