I have a toro 2 cycle lawnmower. When I start it cold, it starts on the first pull. After running for a few minutes and the engine is hot if I turn it off I can not restart it. If I let it sit for 20 minutes and it is cold again, it will once again start on the first pull. A friend told me...

Toro 2 cycle engine - OutdoorKing Repair Forum

Many 2-cycle engines have problems and are sent to the junk yard before their time. Typical problems include hard starting, rough running, a need to adjust the carburetor during use to keep the engine from stalling, a need to rev the engine to keep it from dying, and not starting at all. I will assume the user knows to replace the spark plug regularly, to use fresh fuel, and to replace or clean the air filter.

~~Parts - CCR Powerlite Snowthrower | Toro~~

Dirt particles from the fuel and air can cause deposits that clog the narrow pathways inside the carburetor. There are gaskets and O-rings within the carburetor that over time can shrink. This shrinkage can cause fuel and air leaks, which will also affect engine performance. Jack ' s carries carburetor kits, primer blubs, and replacement gaskets for most major 2-cycle Small Engines to stop those leaks and get you back to peak performance.

~~Carburetors and Parts - 2-Cycle - Jacks Small Engines~~

The engine uses Toro 2-cycle/NMMA-TCW3 engine oil. The mix ratio for the Toro CCR 2000 is 50:1. The snow thrower requires 2.6 oz. of oil for every gallon of gasoline. Add the mixture before starting the engine.
