CNC lathe repair procedures may vary depending on the processes to be undertaken according to customer needs. Whether it is a standard repair or a unique conversion, general repair processes include deep cleaning the lathe. This is followed by dismantling after which MTT experts analyse and assess the extent of damages or wear and tear.

Written in clear, straightforward language, Just-in-Time Manufacturing: An introduction discusses in-depth the implementation of JIT manufacturing. The objectives are twofold: firstly, to acquaint the reader with the overall JIT concept and the factors necessary for its implementation, and secondly to reinforce this with an actual case study of JIT implementation in a manufacturing company.
