This book is dedicated to studying the thermodynamic bases of the structure-function relationship of proteins. It moves from the elementary principles of physical chemistry to the most current topics of biochemistry, including those that may be subject to some controversy. It considers thermodynamic properties related to the stability and function of proteins from the point of view of physics in a language that, without sacrificing conceptual rigor, is easy to read. Detailing the thermodynamics of protein-ligand interactions, protein denaturation, allostery, oxidative phosphorylation and protein phosphorylation, the book will be of interest to students and teachers of chemistry, physics, biochemistry and biotechnology.

The 60th birthday of Prof. Luczak is the reason for this book. He will be honoured for his research work during the "GfA-conference" in March 2009. This book is the corresponding "Festschrift" for him.

Economics for Managers or Managerial Economics is a comprehensive text book written in the light of UGC guidelines for students of BBA, BBM, BBS, MBA, MCom, MA(Eco), AIMA and other similar courses offered by Indian universities and management institutions. Economics concepts

have been explained in simple language for easy understanding. The book is available in two parts that cover both the theoretical and practical aspects of managerial economics and Indian Economy. It presents a complete, rigorous and in-depth study of concepts, tools and principles of microeconomics along with numerous case studies and problems that help management students apply these principles in business decision making. The book also includes the following practical aspects:

- Solved case studies pertaining to budget allocations for advertisement to improve the demand for a product, cost-price nexus, revenue analysis, elasticities in decision making, price elasticities, cross elasticities and break-even analysis
- Detailed examples of different types of pricing like skimming, penetration pricing, price discrimination, incremental pricing, growth maximization with managerial discretion, etc.
- The study of demand elasticity for a product when there is a price increase or price decrease and demand forecasting by assessing the demand for a product or a service using any method.

Additional features included are:

- Problems on Break-even analysis, Cost and Revenue analysis, Theory of Production, Consumer behaviour, Elasticity of demand problems, etc.
- Solved VTU question paper problems and solved case studies including the year 2016

The Traditional Approach To M&A Was To Restrict The Emergence Of Monopolies. The Modern Approach Embodied In The Takeover Regulations Is Meant To Ensure Efficient Use Of Corporate Resources And Protect The Interests Of Minority Shareholders. The Two Streams Of Corporate Restructuring Are Governed By Different Legislations. Company Law Governs Mergers And Sebi Regulations Govern Takeovers. The Value Of Mergers Which Is Governed By Economic Factors Is Quite Large And Practically Ten Times The Value Of Takeovers. The Market Approach Of Takeovers, However, Instills Discipline In Regard To Use Of Corporate Resources By Promoters And Managements. The Corporate Raider Can Always Approach The Shareholders Directly. The Book Analyses Both The Approaches And Identifies The Need For Strengthening Competition Policy And Preventing The Misuse Of Buyback Provisions For Insider Trading.

Decision-making is a pivotal function of any manager. A knowledge of Accounting, insofar as it affects decision-making, is very important for a manager. And very often, students find Accounting as one of the 'tough' subjects to handle. This book strives to make Accounting intelligible and easily comprehensible to students. The text gives a comprehensive coverage of the three branches of Accounting – Financial Accounting, Management Accounting, and Cost Accounting. It focuses on the various methods and techniques followed in the Management Reporting System. The text deals, in detail, with various accounting transaction procedures, methods of costing, ratio analysis, budgeting, forecasting, accounting errors, funds flow and cash flow statements,

trial balance and balance sheet, and so on. It equips the students with the knowledge in the preparation, analysis, evaluation, and interpretation of financial statements, which will enrich their managerial competence and decision-making skills. KEY FEATURES ? Emphasises the various accounting and decision-making techniques. ? Provides a number of problems and their solutions, besides giving notes, working notes, and exercises, to help the students understand the concepts better. This book is intended as a text for the postgraduate students of Management (MBA/MIB), financial courses (MFC), and undergraduate and postgraduate students of Commerce and those pursuing MCA. In addition, the book will be very useful to practising managers who wish to develop effective and result-oriented decision-making skills.

Quantum computing is radically different from the conventional approach of transforming bit-strings from one set of zeros and ones to another. With quantum computing, everything changes. The physics used to understand bits of information and the devices that manipulate them are vastly different. Quantum engineering is a revolutionary approach to quantum technology. Technology Road Mapping for Quantum Computing and Engineering explores all the aspects of quantum computing concepts, engineering, technologies, operations, and applications from
