The Year's Best SF 17 is a showcase of the best short form science fiction of 2011, selected by World Fantasy Award winners David Hartwell and Kathryn Cramer, two of the most respected editors in the field of speculative fiction. Like the previous sixteen volumes of the series that has been called "the finest modern science fiction writing," The Year's Best SF 17 features stories from some of the brightest lights in sf—including Gregory Benford (Beyond Human), Nancy Kress (Beggars in Spain), James Morrow (The Philosopher's Apprentice), Michael Swanwick (The Dragons of Babel) and Neil Gaiman (American Gods) —as well as electrifying short stories from exciting newcomers.

Once again, the finest short-form sf offerings of the year have been collected in a single volume. With Year's Best SF 17, acclaimed, award-winning editors and anthologists David G. Hartwell and Kathryn Cramer demonstrate the amazing depth and power of contemporary speculative fiction, showcasing astonishing stories from some of the genre's most respected names as well as exciting new writers to watch. Prepare to travel light years from the ordinary into a tomorrow at once breathtaking, frightening, and possible, with tales of wonder from: Elizabeth Bear Gregory Benford Neil Gaiman Nancy Kress Michael Swanwick and others.

Undreamed-Of Wonders From The Farthest Reaches Of Imagination In this second volume of the previous year's finest short fantastic fiction, acclaimed editor and anthologist David G. Hartwell showcases new works by stellar literary artists -- acknowledged masters of the genre and exceptionally talented newcomers alike. Astonishing worlds come alive in these pages -- realms of strange creatures and remarkable sorceries, as well as twisted shadow versions of our inhabited earthly plain. A bold and breathtaking compendium of tales -- including a new Earthsea story from the incomparable Ursula K. Le Guin -- Years's Best Fantasy 2 is the state-of-the-art of a unique and winning genre, offering unforgettable excursions into new realities wondrous, bizarre, enchanting...and terrifying.

Twenty-First Century Science Fiction is an enormous anthology of short stories—close to 250,000 words—edited by two of the most prestigious and award-winning editors in the SF field and featuring recent stories from some of science fiction's greatest up-and-coming authors. David Hartwell and Patrick Nielsen Hayden have long been recognized as two of the most skilled and trusted arbiters of the field, but Twenty-First Century Science Fiction presents fans' first opportunities to see what their considerable talents come up with together, and also to get a unique perspective on what's coming next in the science fiction field. The anthology includes authors ranging from bestselling and established favorites to incandescent new talents including Paolo Bacigalupi, Cory Doctorow, Catherynne M. Valente, John Scalzi, Jo Walton, Charles Stross, Elizabeth Bear, and Peter Watts, and the stories selected include winners and nominees of all of the science fiction field's major awards. One of Publishers Weekly's Best Science Fiction Books of 2013 At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Something exciting has been happening in modern SF. After decades of confusion, many of the field's best writers have been returning to the subgenre called, roughly, "hard SF"—science fiction focused on science and technology, often with strong adventure plots. Now, World Fantasy Award-winning editors David G. Hartwell and Kathryn Cramer present an immense, authoritative anthology that maps the development and modern-day resurgence of this form, argues for its special virtues and present preeminence—and entertains us with some spectacular storytelling along the way. Included are major stories by contemporary and classic names such as Poul Anderson, Stephen Baxter, Gregory Benford, Ben Bova, David Brin, Arthur C. Clarke, Hal Clement, Greg Egan, Joe Haldeman, Nancy Kress, Paul McAuley, Frederik Pohl, Alastair Reynolds, Kim Stanley Robinson, Robert J. Sawyer, Karl Schroeder, Charles Sheffield, Brian Stableford, Allen Steele, Bruce Sterling, Michael Swanwick, and Vernor Vinge. The Hard SF Renaissance will be an anthology that SF readers return to for years to come. A major anthology of the "hard SF" subgenre—arguing that it's not only the genre's core, but also its future: Poul Anderson Stephen Baxter Gregory Benford Ben Bova David Brin Ted Chiang Arthur C. Clarke Hal Clement Greg Egan Michael Flynn Joe Haldeman James P. Hogan James Patrick Kelly Nancy Kress Geoffrey A. Landis David Langford Paul Levinson Paul McAuley David Nordley Frederik Pohl Robert Reed Alastair Reynolds Kim Stanley Robinson Robert J. Sawyer rdKarl Schroeder Charles Sheffield Joan Slonczewski Brian Stableford Allen Steele Bruce Sterling Michael Swanwick Vernor Vinge Peter Watts Sarah Zettel At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Age of Wonders: Exploring the World of Science Fiction gives an insider's view of the strange and wonderful world of science fiction, by one of the most respected editors in the field, David G. Hartwell (1941–2016). David G. Hartwell edited science fiction and fantasy for over twenty years. In that time, he worked with acclaimed and popular writers such as Robert A. Heinlein, Poul Anderson, Frank Herbert, Roger Zelazny, Robert Silverberg, Gene Wolfe, Nancy Kress, L.E. Modesitt, Terry Bisson, Lisa Goldstein, and Philip Jose Farmer, and discovered hot new talents like Kathleen Ann Gooan and Patrick O'Leary. Now in Age of Wonder, Hartwell describes the field he loved, worked in, and shaped as editor, critic, and anthologist. Like those other American art forms, jazz, comics, and rock 'n' roll, science fiction is the product of a rich and fascinating subculture. Age of Wonder is a fascinating tour of the origins, history, and culture of the science fiction world, written with insight and genuine affection for this wonder-filled literature, and addressed to newcomers and longtime SF readers alike. Age of Wonder remains "the landmark work" Roger Zelazny called the first edition. The book contains sections that offer advice on teaching courses in science fiction, disquisitions on the controversial subgenre of hard SF, and practical explanations of the economics of publishing science fiction and fantasy. Age of Wonder still lives up to Hugo and Nebula Award winner Vonda McIntyre's description: "An entertaining and provocative book that will inspire discussion and argument for years to come."

Featuring more than sixty groundbreaking short stories by modern science fiction's most important and influential writers, The Ascent of Wonder offers a definitive and incisive exploration of the SF genre's visionary core. From Poe to Pohl, Wells to Wolfe, and Verne to Vinge, this hefty anthology fully charts the themes, trends, thoughts, and traditions that comprise the challenging yet rich literary form known as "hard SF."

The Bear's Baby and Other Stories gathers together for the first time six standalone tales by award-winning author Judith Moffett. Featuring aliens intent on halting humanity's biosphere-destroying behaviour, an alternate USA under the presidency of Davy Crockett, cross-species telepathic communication, angels, dreaming, and climate change - although not all at once! - this is a collection defined by variety, and admirably demonstrates the broad range of Moffett's skill as a writer. With new introductions to each story from the author, The Bear's Baby and Other Stories contains: The Bear's Baby Chickasaw Slave The Realms of Glory Ten Lights and Darks The Middle of Somewhere Space Ballet

"Space opera", once a derisive term for cheap pulp adventure, has come to mean something more in modern SF: compelling adventure stories told against a broad canvas, and written to the highest level of skill. Indeed, it can be argued that the "new space opera" is one of the defining streams of modern SF. Now, World Fantasy Award-winning anthologists David G. Hartwell and Kathryn Cramer have compiled a definitive overview of this subgenre, both as it was in the days of the pulp magazines, and as it has become in 2005. Included are major works from genre progenitors like Jack Williamson and Leigh Brackett, stylish midcentury voices like Cordwainer Smith and Samuel R. Delany, popular favorites like David Drake, Lois McMaster Bujold, and Ursula K. Le Guin, and modern-day pioneers such as Iain M. Banks, Steven Baxter, Scott Westerfeld, and Charles Stross. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

A master of science fiction introduces a world where everything is large and the problems of survival even larger in this exciting new novel. Hella is a planet where everything is oversized—especially the ambitions of the colonists. The trees are mile-high, the dinosaur herds are huge, and the weather is extreme—so extreme, the colonists have to migrate twice a year to escape the blistering heat of summer and the atmosphere-freezing cold of winter. Kyle is a neuro-atypical young man, emotionally challenged, but with an implant that gives him real-time access to the colony's computer network, making him a very misunderstood savant. When an overburdened starship arrives, he becomes the link between the established colonists and the refugees from a ravaged Earth. The Hella colony is barely self-sufficient. Can it stand the strain of a thousand new arrivals, bringing with them the same kinds of problems they thought they were fleeing? Despite the dangers to himself and his family, Kyle is in the middle of everything—in possession of the most dangerous secret of all. Will he be caught in a growing political conspiracy? Will his reawakened emotions overwhelm his rationality? Or will he be able to use his unique ability to prevent disaster?
